

# SPHERIC Beijing 2017 会议资料汇总<sup>1</sup>

## 1 会议手册

- 完整版 [full.pdf](#): 包含会议摘要, 目录和会议日程中有相应超链接。含空白页以使每章从奇数页开始。
- 打印版 [print.pdf](#): 与完整版相比, 去掉了会议摘要和超链接, 但包含封面尾页。
- 网页版 [web.pdf](#): 与完整版相比, 去掉了会议摘要, 且不含空白页。

## 2 会议记要

- [proceedings.pdf](#): 会议记要的主体部分为会议论文集。

## 3 培训资料

- 培训讲议 [notes.pdf](#): SPH Training Day - DualSPHysics code and DesignSPHysics
- 培训材料 [Material.zip](#): Material needed for the course of SPH training day

## 4 摘要 & 幻灯片

编号	题目 (摘要)	幻灯片
1.1	<a href="#">DualSPHysics: a numerical tool to simulate real breakwaters.</a> <a href="#">F. Zhang, S. P. Shang, Alejandro Crespo, José Dominguez, Moncho Gomez-Gesteira, Corrado Altomare, Andrea MarzEDdu</a>	/
1.2	<a href="#">High speed water impacts of fat plates in different ditching configurations through a Riemann-ALE SPH model.</a> <a href="#">S. Marrone, A. Colagrossi, M. De LefEe, L. Chiron, D. Le Touze</a>	/
1.3	<a href="#">Application of improved SPH solid-wall boundary model in missile water exiting.</a> <a href="#">H. L. Zheng, H. F. Qiang, F. Z. Chen, C. Shi</a>	/
2.1	<a href="#">Multiphase Godunov-typed smoothed particle hydrodynamics method with approximate Riemann solvers.</a> <a href="#">Z. W. Cai, Z. Zong, L. Zhou, Z. Chen, C. Tiao</a>	2-1.pdf
2.2	<a href="#">A two-phase SPH model for sediment laden flows.</a> <a href="#">H. B. Shi, X. P. Yu</a>	2-2.pdf

<sup>1</sup>请使用[Adobe reader](#)打开本电子文档。本电子文档中的蓝色文字均为超链接, 鼠标点击可打相应的文件夹或文件。

2.3	Numerical simulation of water-entry problems using an improved multi-phase SPH method. H. Cheng, A. M. Zhang, F. R. Ming	2-3.pdf
2.4	Stable sharp interface method for SPH. M. Y. Zhang	2-4.pdf
3.1	Aircraft tire water spray simulation using SPH. Y. K. Hu, Y. F. Rong, D. X. Leng, F. Xu, X. Y. Gao, R. G. Cao, W. Ding, J. Lv	3-1.pdf
3.2	Numerical simulation of the damage of multi-floor buildings by conical projectile with SPH method. H. F. Qiang, X. Y. Sun, F. Z. Chen, G. X. Zhang	/
3.3	Corrected smoothed particle hydrodynamics for simulating failure progress of model-scale ice. X. Zheng, N. B. Zhang, Q. W. Ma	/
3.4	Numerical study of the mechanism of explosive/impact welding using an improved SPH method. Z. L. Zhang, M. B. Liu	/
4.1	SPH numerical investigation of oscillating characteristics of hydraulic jumps at an abrupt drop. Diana De Padova, Michele Mossa, Stefano Sibilla	4-1.pdf
4.2	An SPH simulation of bubble cavity evolution on underwater movement. J. R. Shao, M. B. Liu	4-2.pdf
4.3	The $\delta$ ALE-SPH model: an improved $\delta$ -SPH scheme containing particle shifting and ALE formulation. P. N. Sun, A. M. Zhang, A. Colagrossi, S. Marrone, M. Antuono	4-3.pdf
4.4	SPH numerical simulation of lift-off by impact of sand particles on flat sand bed. J. Zhao, A. F. Jin, Maimtimin Geni, X. J. Ma	/
5.1	A comparative study of SPH and MPM in modeling mixed-mode failure in rocks. Sam Raymond, Bruce Jones, John Williams	5-1.pdf
5.2	A SPH investigation of soil plastic behaviour with Mohr-Coulomb constitutive model. S. H. Zhao, Ha H. Bui, Vincent Lemiale, Giang D. Nguyen	5-2.pdf
5.3	A robust approach to model rock fracture with SPH. Y. N. Wang, Ha H. Bui, Giang D. Nguyen, P. G. Ranjith	5-3.pdf
5.4	An elasto-plastic- $\mu(I)$ SPH model for landslide induced debris flow. W. T. Zhang, Y. An, Q. Q. Liu	5-4.pdf
6.1	Overview of SPH-ALE applications for hydraulic turbines in ANDRITZ Hydro. Jean-Christophe Marongiu, Magdalena Neuhauser, Martin Rentschler, Etienne Parkinson	/
6.2	Numerical and experimental investigation of two porous wave - breaking structures. W. Q. Hu, Q. Fan, J. M. Zhan, W. H. Cai	6-2.pdf 6-2.pdf

6.3	SPH for the interaction between tsunami wave and upright cylindrical groups. J. J. Li, L. Tian, Y. S. Yang, L. C. Qiu, Y. Han	6-3.pdf
6.4	Hydrodynamics characteristics of land hinged oscillating wave surge converter with SPH method. D. H. Zhang, Y. X. Shi, C. Huang, Y. L. Si, B. Huang, and W. Li	6-4.pdf 6-4.pdf
7.1	The study on SPH method with space variable smoothing length and its applications to multi-phase flow. W. K. Shi, Y. M. Shen, J. Q. Chen	7-1.pdf
7.2	A dynamic refinement strategy in SPH for simulating the water entry of an elastomer. L. Wang, F. Xu, Y. Yang	7-2.pdf
7.3	Adaptive particle splitting in the finite volume particle method. Nathan J. Quinlan	/
8.1	Modeling the melting process of quartz glass using SPH method. Z. Y. Liu, Q. L. Ma, H. S. Fang	8-1.pdf
8.2	Study on dynamic behaviors of liquid-filled flexible multibody systems under the low-gravity environment. W. Z. Kong, Q. Tian	8-2.pdf
8.3	A SPH model for the root system of plants. Matthias Mimault, Lionel Dupuy, Mariya Ptashnyk	8-3.pdf
8.4	SPH simulation of drop impact on a hot wall with vaporization effects. X. F. Yang, S. C. Kong, M. B. Liu	8-4.pdf
9.1	Developing an Extensible, Portable, Scalable Toolkit for massively parallel Incompressible Smoothed Particle Hydrodynamics (ISPH). X. H. Guo, Benedict D. Rogers, Steven Lind, Peter K. Stansby	9-1.pdf
9.2	Three-dimensional sloshing simulations by using GPU-based MPS method. X. Chen, X. Wen, D. C. Wan	9-2.pdf
9.3	GPU-based SPH modeling of flood with floating bodies in urban layouts including underground spaces. J. S. Wu, N. Li, W. Y. Liu, H. Zhang	9-3.pdf
9.4	Improve the effectively of computational fluid dynamics work based on supercomputing cloud. N. Qiao	9-4.pdf
10.1	SPH energy balance during the generation and propagation of gravity waves. Domenico Davide Meringolo, Y. Liu, A. Colagrossi	/
10.2	Water hammer analysis using SPH in density summation form. D. Q. Hou, C. Y. Huang, M. L. Wang, H. F. Duan	10-2.pdf
10.3	Particle trajectory calculation in SPH. J. Y. Shen, W. H. Lu, D. Q. Hou, Arris S. Tijsseling	10-3.pdf
10.4	Simulating shock waves with corrective smoothed particle method (CSPM). C. Y. Huang, J. Deng, D. Q. Hou, Arris S. Tijsseling	/
11.1	SPH modeling of fluid-structure interaction (FSI). L. H. Han, X. Y. Hu	/

11.2	Numerical modeling of 2D complex movement patterns to FSI problems using smoothed particle hydrodynamics. C. Zhuang, D. A. Hu, T. Long, G. Yang	/
11.3	Implement of the MPS-FEM coupled method for the FSI simulation of the 3-D dam-break problem. Y. L. Zhang, D. C. Wan	11-3.pdf
11.4	A new numerical method for SPH fluid-solid coupling simulation and its preliminary verification. X. J. Ma, Geni Mamtimin, A. F. Jin	/
12.1	An enhanced ISPH-SPH coupled method for incompressible fluid-elastic structure interactions. Abbas Khayyer, Hitoshi Gotoh, Yuma Shimizu, Hosein Falahaty	/
12.2	Interaction between solitary wave and flexible plate based on MPS-FEM coupled method. C. P. Rao, D. C. Wan	12-2.pdf
12.3	Modeling of single film bubble and numerical study of the plateau structure in foam system. Z. G. Sun, N. Ni, Y. J. Sun, G. Xi	/
12.4	Numerical simulation of Rayleigh-Taylor instability by MPS multiphase method. X. Wen, D. C. Wan	12-4.pdf
13.1	Numerical simulation of particle collision and breakup behavior by SDPH-FVM coupling method. H. F. Qiang, F. Z. Chen	13-1.pdf
13.2	A physics evoked meshfree method. Z. B. Ma, Y. Z. Zhao	13-2.pdf
13.3	Suppression of non-physical voids in the finite volume particle method. Mohsen H. Moghimi, Nathan J. Quinlan	/
13.4	The Hermit-type RRKPM for piezoelectric materials. J. C. Ma, G. F. Wei	/
14.1	A development of a SPH model for simulation of abrasive-water-jet impacting on a metallic surface. X. W. Dong, Z. L. Li, J. L. Liu	/
14.2	SPH simulation of Couette flow with sinusoidally moving solid boundary. H. Q. Li, H. T. Liu, J. Z. Chang	14-2.pdf
14.3	Application of particle-based computational acoustics to sound propagation and scattering. Y. O. Zhang	14-3.pdf
14.4	Image processing with the SPH method. C. Y. Huang, W. H. Lu, D. Q. Hou, X. Cheng	/
15.1	Analysis of the hydrological safety of dams using numerical tools: Iber and DualSPHysics. J. González-Cao, O. García-Feal, A. J. C. Crespo, J. M. Domínguez, M. Gómez-Gesteira	15-1.pdf
15.2	Construction of two-dimensional SPH numerical wave tank. J. Y. Wang, F. Xu, Y. Yang	/

---

15.3	<a href="#">An SPH numerical wave-current tank.</a> <a href="#">M. He, H. S. Wang, X. F. Gao, W. H. Xu, Y. Shi</a>	<a href="#">15-3.pdf</a>

## 5 图文设计

- 胸牌: 源文件 [nametags.psd](#) 及工作 / 与会人员胸牌 [personnel.pdf](#) / [participants.pdf](#)。
- 奖状: 源文件 [award.psd](#) 及 [best.pdf](#)、[outstanding.pdf](#)、[excellent.pdf](#)。
- 展板: 源文件 [board.psd](#) 及 [board.pdf](#)。
- 海报: 源文件 [poster.psd](#) 及 [poster.pdf](#)。
- 布袋: 源文件 [bag.psd](#) 及 [bag.pdf](#)。

## 6 财务相关

- 参考: [财务办理指南](#)、[北大会议标准](#)
- 预算: [会议预算 \(提交\)](#)、[会议预算 \(自留\)](#)
- 报销: [大额审批表](#)、[会议费报销单](#)、[议签到表](#)
- 决算: [会议决算 \(自留\)](#)、[注册费详细 \(自留\)](#)

## 7 其它

- [教育部批复文件](#)、[会议通知](#)、[新闻稿](#)、[会议筹备分工表](#)
